

## The Colour of Your Blood

Somewhere between a blood-splattered St Georges cross and a safety-pinned Union Jack, Teri Louise Kellys protagonist, the blue-eyed boy of Englands dreaming, finds his allegiance waning and his will to fight abating. Torn from the tranquillity of the post-war years into a new vision of anarchy stretched across all fronts, one boys struggle to understand his race bleeds out slowly into a gutter already overflowing with aborted history, discarded ideologies and racist undertones. A story recounted in a unique, offbeat voice, *The Colour of Your Blood*, is a novella transfused with the love and hate patriotism and heritage inspire; planted stubbornly on a Clockwork Orange battlefield. A work that both occupies and encapsulates; satirically and sublimely, the ever-changing face of a nation through three of its most turbulent decades. Thirty years of English swinging, kicking, clubbing, bombing and pogoing all culminating in yet another war and a lick of mascara; thirty years that shaped a nation and almost sunk the Royal boat once and for all.
